General Information

Before we go into the lists of players that outperformed based on our data models, we first want to discuss the dataset and reporting structure.

For our scout report 01-06-2023 'America', we ended up collecting data of all players under the age of 23 from the top 15 leagues in America. This resulted in a total dataset of 803 football players. The data used for this report was collected from Wyscout.com on 30-05-2023.

These 803 players are grouped into ten different positions; Goalkeepers, Centre-Backs, Left-Backs, Right-Backs, Defensive Midfielders, Central Midfielders, Attacking Midfielders, Left-Wingers, Right-Wingers and Central Forwards. To make this report useful for football organizations with varying sizes, we decided to group these positions by market value. We created three different kinds of market-value groups; €0 - €400.000, €400.000 - €1.000.000 and €1.000.000 - €5.000.000. We decided to pass over players with a market value above €5.000.000, since these players are already highlighted enough by other sources.

The lists of players per position will contain the top three performing players based on our data models, grouped by market value. These lists are in order of performance, and the best performing player per position is recognizable due to the OTW Scouts logo before the name.

Last of all, keep in mind that these players are selected 100% based on OTW Scouts' data models, without any kind of video/live scouting methods involved.
